I see this as another OJ Simpson trial...proof that if one has lot's of money, one can get away with murder.

M\$ will continue their strangle hold on the consumer and corporate America. They will continue unfair practices...dose the DOJ actually expect 3 auditors to keep M\$ on the straight and narrow?

Osama bin Laden the **millionaire** terrorist supporter sees to it that thousands of people are killed with planes. We sent special forces after him and his kind.

**Billionaire** Bill Gates and company (a US Terrorist/Monopoly if there ever was one), does not kill people...he just bleeds them of their hard earned money by deceptive practices, terminates competition by buying or squashing them out of existence. This is fair?

I'm working on switching to Linux rather than sending any more money to M\$.
